Education

Dr. B. R. Ambedkar National Institute of Technology, Jalandhar

2022 – Present

Bachelor of Technology

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Java
- **Frontend:** React.js, Redux, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, Authentication (JWT, bcrypt), webSockets
- **Databases:** MongoDB, PostgreSQL, Prisma
- **Cloud & DevOps:** Docker, AWS (EC2, S3), CI/CD
- **Tools:** Git, GitHub, Postman
- **Core CS:** Operating Systems, Computer Networks

Projects

Collaborative Whiteboard Application

[GitHub](#)

React, TypeScript, Canvas API, WebSocket, AWS

- Built a real-time collaborative whiteboard enabling multiple users to draw and edit content simultaneously on a shared canvas.
- Implemented freehand drawing, shape creation, element selection, and drag-and-drop interactions using HTML Canvas and TypeScript.
- Designed a WebSocket-based synchronization layer to broadcast drawing events and maintain a consistent canvas state across connected clients.
- Optimized rendering performance using requestAnimationFrame, React refs, and selective canvas redraw techniques to reduce unnecessary rendering overhead.
- Structured drawing logic into reusable modules, simplifying the addition of new tools and improving maintainability of the codebase.
- Deployed the application on AWS and configured end-to-end communication between frontend and backend services for internet-scale access.

Splitzy – Group Expense Manager

[GitHub](#)

React, TypeScript, Node.js, Express, PostgreSQL, Prisma, JWT

- Built a full-stack expense management application for creating groups, tracking shared expenses, and managing settlements.
- Developed 10+ REST APIs using Node.js, Express, PostgreSQL, and Prisma ORM for user, group, and expense management.
- Implemented JWT-based authentication and role-based authorization to secure protected routes.
- Built a full-stack expense management platform enabling users to create groups, record shared expenses, and track balances.
- Designed and implemented 10+ REST APIs using Node.js, Express, PostgreSQL, and Prisma ORM for user, group, expense, and settlement workflows.
- Designed a normalized PostgreSQL database schema using Prisma ORM to efficiently manage users, groups, expenses, and settlements.

Achievements

- Strong grasp of Data Structures and Algorithms including DP, Graphs, and Recursion, solving 300+ DSA problems on [LeetCode](#),gfg etc.
- Coordinated Utkansh 2025, a techno-cultural fest with 15,000+ attendees and 75+ events, optimizing logistics, scheduling, and stakeholder coordination.
